

CAS SciFinder® Online Workshop

CAS SciFinder is an **essential database for chemical researchers**. It enables comprehensive searches of a wide range of data, including journal articles, patents, chemical substances, and organic chemical reaction information from around the world by keyword, substance name, or chemical structure formula.

Date & Time

2026

May 22nd (Fri) 16:40-18:10

Contents

[Basic Operations of CAS SciFinder]

- Reference Search (by keyword)
- Substance Search (by substance name or chemical structure)
- Reaction Search

[Products Introduction of CAS SciFinder Discovery Platform]

- CAS Analytical Methods (Search service for chemical analysis methods)
- CAS Formulus
(Search service for professionals in formulation design and formulation-related work)

Guest Lecturer

Akihiro TSUIKI

from Information Technology Division, Japan Association for International Chemical Information

Style

Online (Teams) This workshop will be held in English.
Details will be provided upon registration.

Apply

Please apply through the library website or the QR code on the right.
Library website > Events > CAS SciFinder Online Workshop

※5月21日(木) 16:40~18:10 日本語編も開催します(同一内容)
